SUMMARY

Backend-focused software engineer with strong foundations in Java, data structures, algorithms, multithreading, and object-oriented design. Experience building scalable REST APIs, concurrent systems, and production-ready backend services.

SKILLS

Languages: Java, C++, Python, JavaScript, TypeScript

Core CS: Data Structures, Algorithms, OOP, Multithreading, DBMS, Operating Systems

Backend: Spring Boot, Node.js, Express.js, REST APIs, JWT Authentication, Firebase, Maven, Tomcat

Databases: PostgreSQL, MongoDB, MySQL

Tools: Git, Docker, Linux/Unix, Shell Scripting, CI/CD, GitHub Actions

PROJECTS

DispatchCore – Multi-Tenant Logistics SaaS

GitHub: github.com/arsh342/dispatchCore Live: dispatchcore.tech

- Built multi-tenant logistics platform supporting 5 user roles with modular REST services, tenant-aware middleware, and real-time delivery tracking
- Integrated Firebase Authentication and Firebase Realtime Database for secure authentication and live order synchronization across tenants
- Designed scalable backend workflows using Node.js, PostgreSQL, and Sequelize with transaction isolation, composite indexing, and optimized database query performance
- Implemented transactional email workflows using Resend API integration

Job Application Service – Spring Boot REST API

GitHub: github.com/arsh342/Job-Application-Service

- Built layered Spring Boot backend deployed on Tomcat with Maven, JWT authentication, and centralized exception handling
- Developed JSP-based frontend views served through Tomcat for job listing and application management workflows
- Designed MySQL schemas with indexing and validation ensuring scalable CRUD operations and efficient query execution

CareerCompass – AI Career Platform

GitHub: github.com/arsh342/careercompass Live: careercompassai.vercel.app

- Built backend services with role-based authentication, REST APIs, and subscription workflows for production deployment
- Designed modular service architecture and integrated external LLM APIs into application workflows

SecureFlow AI – Multi-Agent Security Platform

GitLab: gitlab.com/gitlab-ai-hackathon/participants/34775220

- Developed backend orchestration workflows for security scanning, secrets detection, and dependency vulnerability analysis
- Implemented parallel task execution pipelines generating JSON compliance reports aligned with OWASP Top 10

EDUCATION

B.E. Computer Science – Chitkara University

CGPA: 8.70

Coursework: Data Structures, Algorithms, Operating Systems, DBMS

2023–2027
Punjab, India

CERTIFICATIONS

Anthropic, 2026 – Model Context Protocol (Foundations & Advanced), Claude Code in Action

ACHIEVEMENTS

- Hacktoberfest Contributor, 2025 – Accepted open-source contributions
